Skid System

Square Robot's patented Side Launcher System enables safe and efficient on-stream robotic tank inspections when robot launch and recovery access through a roof manway is not preferred due to product flash point or internal floating roof deck access.

Square Robot's Side Launcher System consists of two primary elements:

- Square Robot Side Launcher – Manway Adapter Valve (SRSL-MAV)
- Square Robot Side Launcher – Vehicle Chamber (SRSL-VC)

Manway Adapter SRSL-MAV

- A skidded manway adaptor, 24" full opening gate valve, and blind flange system that can be installed at your convenience before Square Robot's inspection or other tank operation.
- Square Robot offers this system for sale or rent to support a variety of manway sizes and requirement

VEHICLE CHAMBER SRSL-VC

- A skidded vehicle chamber system that enables Square Robot to safely and efficiently launch and recover its SR-3 robot for inspection operations.
- Offered only as a rental system.
- Typically installed and removed at the time of robotic inspection.

VEHICLE CHAMBER SRSL-VC SPECIFICATION

SRSL – VC SKID PACKAGE	
DIMENSIONS (LIGHT GREY)	90 IN X 24 IN Diameter
WEIGHT	Empty: 3500 LBS (1130 KG) Filled: 4750 LBS (1700 KG)
SHELL MANWAY ROUND CLEARANCE	20.9 IN Minimum to Manway Center
PRESSURE RATING	150 PSIG
TEMPERATURE RATING	-13°F to 131°F (-25° C to 55° C)

Key Features:

- Patented Factory Mutual Class 1 Division 1 certified system and process
- Designed to ASME B31.3 & ASME B31.4
- Robust, skidded system design with adjustable leg height and cribbing locations
- Easy transport and lifting with both pad-eye and forklift pocket options
- Standard API 24”, 30”, 36” manway interface – other sizes, configurations available
- Standard ASME 24” Class 150 lockable valve and vehicle chamber interface
- Standard ASME 2” Class 150 lockable valves for vent, drain, and equalization
